

Series 300

## At the right place at the right time

We know the challenges facing logistics and shipping. This is why Logopak offers you the Series 300, a versatile labelling system which offers unrivalled price and performance while still meeting your requirements.

## Perfect labelling for cartons and containers

The labelling solution is a critical part of the line process and must deliver maximum accuracy. The Logopak solutions for containers and cartons offer an ideal combination of speed, precision, reliability and flexibility. The barcode online validation essentially acquires each barcode and serves as the control between the labeller and the production line. It can trigger a stop or sort out faulty barcodes and supply them for relabelling.

An intuitive user interface (TDI touch screen) featuring intelligent troubleshooting enables rapid fault detection and elimination.

# Plug & Play

## Easy installation and operation

- » **Flexible:** Manual height and side adjustment
- » **Adaptable:** 4 applicators to choose from for a wide range of standard applications
- » **Fast:** It can apply up to 80 labels per minute with a running length of 600 m
- » **No risk:** Our non-contact "blow-on" technology ensures clean, wrinkle-free labels on a wide range of surfaces
- » **Cost-effective:** A cost-efficient, reliable solution for simple high-speed labelling
- » **Durable:** A reliable design in tried and tested Logopak quality
- » **High barcode quality:** Optional scanner for validation
- » **Low cost:** The machine is delivered on only one Euro pallet

Up to  
**80 labels per minute**

**Easy**  
to install

**Various applicator options**  
for a wide range of standard applications

**Suitable for**  
outer packages,  
cartons and containers

## Now featuring the latest generation of machineware – PowerLeap 6

This integrated machine software allows you to monitor all machine functions and communicate with the production line and an ERP or WMS system via the intuitive HMI control unit and its graphical user interface.

- » User-friendly and easy to use
- » Multilingual GUI
- » Straightforward menu navigation
- » All components are precisely matched to each other

## Intelligent data management for secure labelling processes with LogoSoft

LogoSoft makes the labelling process for your Print & Apply tasks even more efficient and secure. The powerful software solution ensures flexible automation that allows you to centrally control and monitor all labelling processes. Barcode and RFID standards are

already stored in the system for this purpose. Continuous data synchronization between the ERP system and supported devices guarantees that the right data is always available at the right place.

- » Higher productivity
- » Minimisation of errors and downtimes
- » Future-proof production
